

## Chapter 3.1 – Appendix B WHS Hazard and Risk Assessment Template

- This form is used when a documented risk assessment is required in accordance with Appendix A of WHSMS Handbook Chapter 3.1.
- Original risk assessments must be provided in a convenient location accessible by all people affected by the risk assessment.
- Static risk assessments must be forwarded to local WHS Manager for inclusion in the School Static Risk Assessment Register.

| Static Risk Assessment No.   |  | Assessment Date   | Reviewed by Date  | Version  | Top Residual Risk |       |

| <b>Type of RA</b>  | <input checked="" type="checkbox"/>  | <b>Static RA (long term, &gt; 6 months)</b>   | Send a copy to WHS Manager and keep original locally near the activity/location, accessible to all people affected.     |  |                   |       |
|  | <input type="checkbox"/>   | <b>Dynamic RA (short term &lt; 6 months)</b>  | Keep the original locally (electronically or physically) near the activity/location, accessible to all people affected. |  |                   |       |

## Risk Assessment Instruction

- Using Error! Reference source not found. as a guide, list the hazards of the activity in the 'Hazards' column of the RA Form. Include information on when and where the hazard is present during the activity.
- Estimate inherent risk of the hazard (without any controls in place) using the Likelihood against Consequences definitions described in [Table 1](#) and [Table 2](#) and the ANU WHS Risk Matrix ([Table 3](#)). List them in 'Inherent Risk' column of the RA Form for each hazard.
- Develop control measures in accordance with the Hierarchy of Control Principle ([Table 4](#)) and list them in 'Control' column of the RA Form.
- Estimate the residual risk of the hazard after implementing all controls. Remember that engineering, administrative and PPE controls only reduce the likelihood of an event occurring, not the consequences.
- Identify any controls that are not in place as corrective actions and implement them before undertaking the activity.
- Obtain approval from relevant people as identified.
- Identify if this is a static risk assessment (> 6 months) or dynamic risk assessment (< 6 months).
- Send a copy of the static risk assessments to WHS Managers– Keep on file for 7 years.
- Keep originals of risk assessments in close vicinity of the activity. Dynamic risk assessments can be destroyed 1 year after the activity ceases.
- Review the static risk assessments and associated safe work procedures in accordance with **Section 3.1.2.6: Step 4 of Chapter 3.1** requirements.

| Risk Assessment   |               |              |             |  |               |               |             |
|---|---------------|--------------|-------------|--|---------------|---------------|-------------|
| Hazards<br>Also list where and when can the hazards present?          | Inherent Risk |              |             | Control Measures<br>When designing controls, follow the Hierarchy of Controls Principle, assigning the most effective controls before less effective controls (see Table 4).<br><i>List the control category and the controls for each hazard below. For any controls that are not in place, fill in the Actions table on the next page.</i>   | Residual Risk |               |             |

They are NOT to attend Campus if found to be Positive.</li> <li>Workers suspecting, they may be infected are not allowed on campus.</li> </ul> <b>Engineering</b> <ul style="list-style-type: none"> <li>Access to buildings restricted via Cardex/Salto to people who have confirmed to abide by the school COVID Protocols/Procedures</li> <li>Separation of workstations to adhere to physical distancing conditions.</li> <li>Automatic hand sanitiser stations in the foyers of all buildings.</li> <li>Handwashing facilities in building bathrooms.</li> </ul> <b>Administration</b> <ul style="list-style-type: none"> <li>Follow University Guidelines requirements.</li> <li>Maintain hygiene practices on entering and leaving buildings</li> <li>If a staff member working on campus is diagnosed with COVID-19 – ANU procedures are followed for disinfection of workspace.</li> <li>Safe Work Procedure or local area specific rules on work arrangements addressing work under COVID-19 restrictions.</li> </ul> | Unlikely      | Moderate    | Medium      |

| Actions  |                           |           |                |
|--|---------------------------|-----------|----------------|
| <p><b>The activity must not be commenced until all controls are in place.</b><br/>           List below which controls are currently not in place, who will implement them and by when. Add additional rows as needed.</p> |                           |           |                |
| List of Controls not in place  | Who is to implement them? | Timeframe | Date Completed |
|  |                           |           |                |
|  |                           |           |                |
|  |                           |           |                |

If the level of residual risk is assessed as high or extreme,

1. Stop the activity immediately; AND
2. Tag out the plant/equipment; and/or
3. Secure any chemical; and
4. Implement, or seek advice from WHS Officer or Subject Matter Experts to implement, additional controls to reduce the residual risk further to medium [Supervisor signature required];
5. If the above is not possible, seek approval from relevant authority (High – School/Division Director/College Dean; Extreme – COO). **NOTE: Approval will only be granted in exceptional circumstances after consultation with Associate Director, WEG and/or a Subject Matter Expert.** See Chapter 3.1 for details.

| Approval required   |                    |                                  |                      |                    |                    |

| Worker conducted RA |                    |                                  | Student conducted RA |                    |                    |
| Residual Risk Level | Authority required | Signature and date               | Residual Risk Level  | Authority required | Signature and date |
| Low                 | Author of RA       |                                  | Low                  | Supervisor         |                    |
| Medium              | Supervisor         | <i>Horst Punzmann</i> 20.07.2023 | Medium               | Supervisor         |                    |
| High                | School Director    |                                  | High                 | School Director    |                    |
| Extreme             | COO                |                                  | Extreme              | COO                |                    |

**Table 1. Likelihood Table**

| Ranking        | Description  | Probability or frequency of event happening |
|----------------|--|---|
| Almost certain | The hazard is expected to lead to an event in most circumstances at the University | A daily to monthly occurrence               |
| Likely         | The hazard could lead to an event in most circumstances at the University          | Between monthly to yearly occurrence        |
| Possible       | The hazard has led to an event at some time at the University                      | Occurs once between 1 to 5 years            |
| Unlikely       | The hazard could lead to an event at some time                                     | Occurs once between 5 to 20 years           |
| Rare           | The hazard may lead to an event in exceptional circumstances                       | Occurs once between 20+ years               |

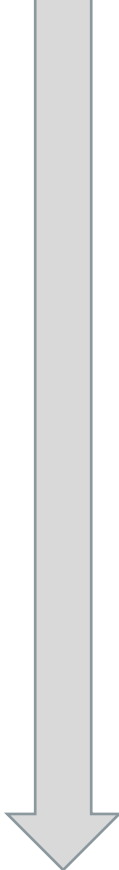

**Table 2. Consequences Table**

| Ranking       | Injury, Illness or Disease  | Plant, Equipment and materials  | Environment   |
|---------------|---|---|---|
| Catastrophic  | Fatality / fatalities or permanent disability. Permanently unable to work   | Destroyed or cannot be reused   | Long term permanent effect to ecosystems. Significant intervention required to remediate                      |
| Major         | Requiring extensive medical treatment such as hospitalisation as in patient and possibly a Notifiable Incident<br>LTI >1 week   | Damage requiring repairs/rebuild and possible recertification prior to reuse, lost use for one or more days | Notification to environmental agency, ecosystem will need time to recover, intervention required to remediate |
| Moderate      | Minor medical treatment injury, such as treated by a health professional, hospital outpatient, no potential to be a Notifiable Incident<br>LTI < 1 week and can return to normal duties | Damage requiring a repair/service by a trade/technician within the day                                      | Contamination event that does not impact on ecosystem. Short impact does not need intervention                |
| Minor         | Injury needing significant first aid treatment and can return to work within shift  | Equipment able to be reset or gotten back into operation by the operator                                    | Minor contained contamination ceasing when the short event is over, can remediate (e.g., spill kit)           |
| Insignificant | Report only, no injury OR minor first aid (e.g., Band-Aid); short-term discomfort   | Report only, no damage  | Report only, no contamination   |

**Table 3. ANU WHS Risk Matrix**

|                | Insignificant | Minor      | Moderate     | Major        | Catastrophic |
|----------------|---------------|------------|--------------|--------------|--------------|
| Almost certain | Medium (10)   | High (14)  | Extreme (21) | Extreme (22) | Extreme (25) |
| Likely         | Medium (7)    | High (13)  | High (16)    | Extreme (20) | Extreme (24) |
| Possible       | Low (4)       | Medium (9) | High (15)    | High (18)    | Extreme (23) |
| Unlikely       | Low (2)       | Medium (6) | Medium (8)   | High (17)    | High (19)    |
| Rare           | Low (1)       | Low (3)    | Low (5)      | Medium (11)  | Medium (12)  |

**Table 4. Hierarchy of Controls**

| Level                               | Examples   | Effectiveness   |
|-------------------------------------|--|---|
| Elimination                         | <ul style="list-style-type: none"> <li>Remove the hazards completely</li> <li>Cease the activity</li> <li>Dispose of unwanted hazardous chemicals or plant etc</li> </ul>  | <p style="text-align: center;"><b>Most Effective</b></p>  <p style="text-align: center;"><b>Least Effective</b></p> |
| Substitution                        | <ul style="list-style-type: none"> <li>Use less hazardous chemicals</li> <li>Use safer plant equipment</li> <li>Use handset instead of telephone</li> <li>Move smaller weight loads instead of large weight</li> </ul>   |   |
| Isolation                           | <ul style="list-style-type: none"> <li>Physical separation from the hazard by distance or complete shielding</li> <li>Install guard rails around edges and holes to floors</li> <li>Move workers to a new room away from hazardous noise</li> </ul>  |   |
| Engineering Control                 | <ul style="list-style-type: none"> <li>Use ventilation system</li> <li>Use fume cupboard when working with hazardous chemicals</li> <li>Install guarding around rotating and crushing parts</li> <li>Use trolley or hoist to lift heavy loads</li> <li>Use duress alarm system while doing home interview or offsite field work</li> </ul>                             |   |
| Administrative Control              | <ul style="list-style-type: none"> <li>Use Safe Work Procedures [<b>See section 3.1.3.1</b>] or instructions</li> <li>Induction and WHS information</li> <li>Training [<b>See Handbook Chapter 3.2</b>]</li> <li>Contingency Planning and Testing [<b>See section 3.1.3.2</b>]</li> <li>Permit to Work system [<b>See section 3.1.3.3</b>]</li> <li>Signage</li> </ul> |   |
| Personal Protective Equipment (PPE) | <ul style="list-style-type: none"> <li>Lab coat</li> <li>Safety glasses/face shield</li> <li>Gloves/cryogenic gloves</li> <li>Respirators/Masks</li> <li>Personal hearing protectors</li> </ul>  |   |

**Table 5. Risk Assessment and SWP review timeframe**

Use this Table to determine review timeframe and frequency for the risk assessment and any safe work procedures.

| Residual Risk | Review Frequency |  | What to do during the review.   |
|---------------|------------------|--|---|
| Extreme       | 6 month          | And/or <ul style="list-style-type: none"> <li>After an incident where deficiencies in identifying or controlling hazards have been observed</li> <li>When changes to the activity need to occur</li> <li>When significant changes (e.g., renovation) to the workplace occur</li> <li>When HSRs request a review</li> </ul> | <b>Stop work.</b><br>Review the control measures and introduce additional control measures to reduce the residual risk to <b>Medium</b> as a maximum. |
| High          | 1 Year           |  |   |
| Medium        | 2 Years          |  | Review the control measures.  |
| Low           | 3 Years          |  |   |
